Spartan'14 & *Spartan'14 Parallel Suite* Rehosting Instructions

1) Install Spartan'14 on the "recipient" computer – the computer you will move the license TO.
Download links:

Windows 64-bit (394 MB): http://downloads.wavefun.com/Spartan14-64bit-Installer.exe
Windows 32-bit (395 MB): http://downloads.wavefun.com/Spartan14-32bit-Installer.exe

Not sure which version you have? The following link contains both versions and will automatically install the correct one for your system. However, it will take approximately 30% longer to download due to the larger file size.
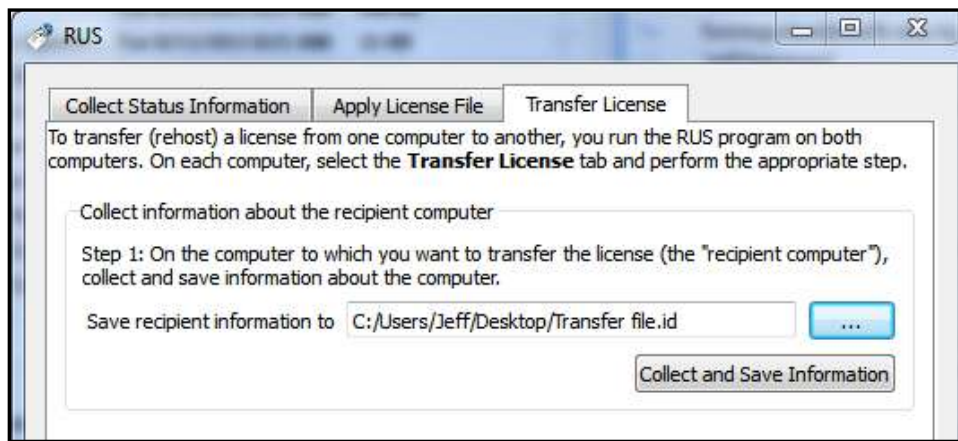

Windows 32 and 64 bit (778 MB): http://downloads.wavefun.com/Spartan14-Installer.exe

Click "Cancel" when presented with licensing options, as seen here. Continue with installation by selectiong "Next" and "Continue" where appropriate.
Select Licensing Option:

- ● Individual   32 digit product key, installed locally on the machine
- ○ Network   Server-based license, prompts for server name or IP address

2) On "recipient computer", download the "Rehosting" program from the following link then right-click it and select "Run as Administrator".
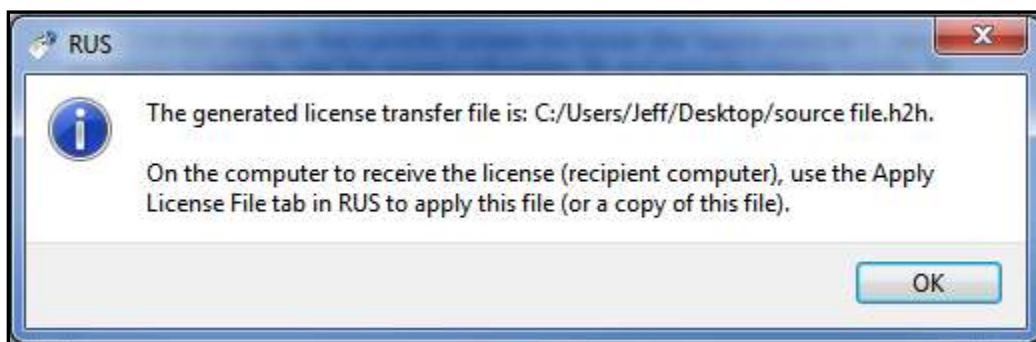

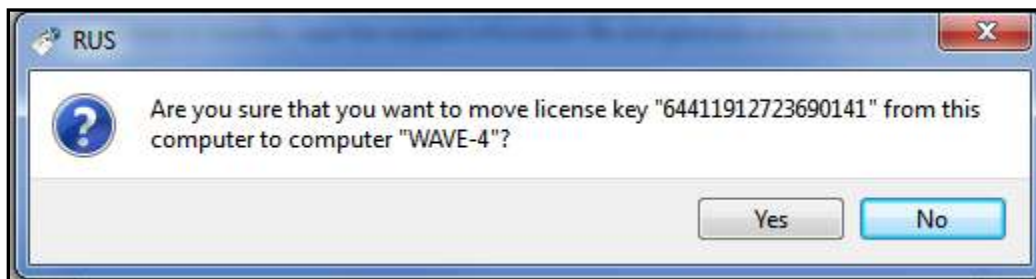

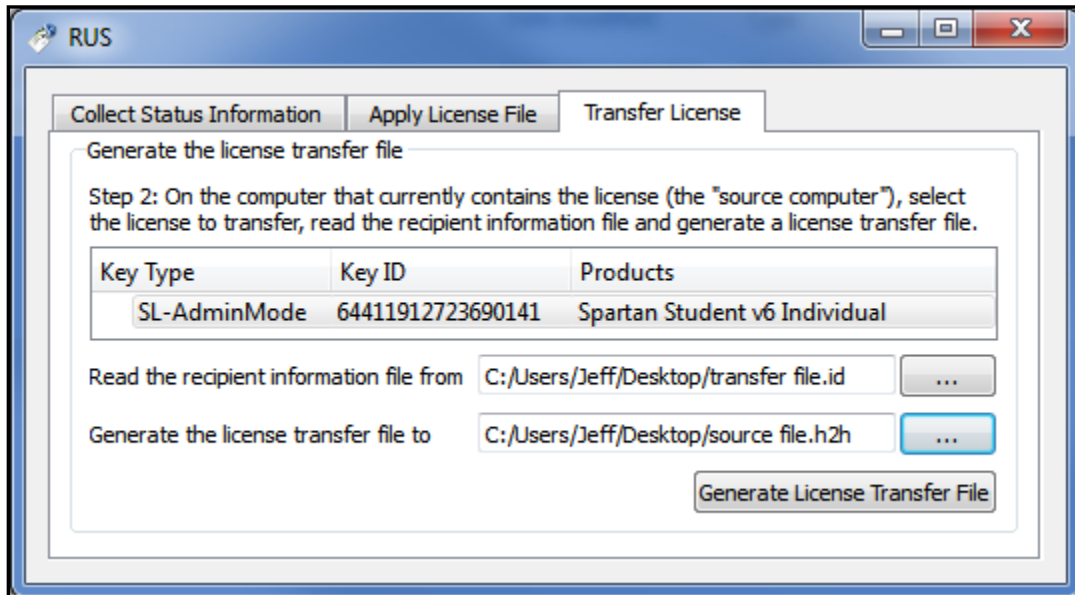

http://downloads.wavefun.com/Rehost.exe

3) In the "Transfer License" tab, save the computer's ID file by clicking the ⎡...⎤ button and naming it "transfer file". Click "Collect and Save Information" to create the file. Transfer the "transfer file.ID" file to the "source computer" – the computer that currently contains the license you want to transfer. Leave RUS open.

RUS

| Collect Status Information | Apply License File | Transfer License |

To transfer (rehost) a license from one computer to another, you run the RUS program on both computers. On each computer, select the **Transfer License** tab and perform the appropriate step.

Collect information about the recipient computer

Step 1: On the computer to which you want to transfer the license (the "recipient computer"), collect and save information about the computer.

Save recipient information to   C:/Users/Jeff/Desktop/Transfer file.id   [...]

[Collect and Save Information]

4) On "source computer", download RUS Updater from the link in Step 2 then right-click it and select "Run as Administrator". Go to the "Transfer License" tab.

5) Click on the [...] next to "Read the recipient information file from" line, and point to the "transfer file.ID" that you moved to the "source computer". Click on the [...] next to "Generate the license transfer file to" line and save file as "source file.h2h". Click "Generate License Transfer File" button and save the file, then click "Yes", then "OK" when prompted. See images below.

6) Move the "source file.h2h" file to the "recipient computer". In RUS, click on the "Apply License File" tab, then click on the [...] and point to the "source file.h2h" file. Click "Apply Update". If applied successfully, you will see "Update written successfully" as seen in the image below.
